

Moon Missions

Since the 1950s, countries have tried to explore the Moon. It's true that each mission costs a huge amount of money. These adventures in space, however, will help us understand more about the Moon and our planet's origins. Every successful trip to the Moon gives us more information thanks to the wide variety of experiments that humans and robots conduct there.

Your story should begin with this sentence: **One day, Yumi was listening to her science teacher in class.**
