

Nicola Tesla was a famous inventor born in 1856 in a village in Croatia. As a young man, he studied science and technology. In 1884, Tesla moved to the United States to work with Thomas Edison, a well-known inventor. Tesla dreamed of using electricity to help people. He created a new way to send electricity to homes and buildings, making it safer and easier for people to use. Tesla also had many ideas about how to send power without wires. Although he did not become rich, his inventions are still important today. Tesla spent most of his life in New York City, and he worked hard until he passed away in 1943.
